

MONTHLY BRIEF

HISTORICAL EDITION · Historical edition, published on 8 September 2026 using data for May 2025.

Tourism & Hospitality Brief

Portugal, May 2025: overnight stays +1.3% and total revenue +8.7% year on year.

May's growth came from residents alone. Total revenue rose 8.7% and RevPAR 6.7%, but net bed occupancy gave up 0.5 pp: the extra value came from rate, not from fuller beds.

Historical edition v1.0 - revised data

EXECUTIVE SUMMARY

May grew on domestic demand alone

MAIN CONCLUSION

Overnight stays rose 1.3%, but the entire gain came from residents (+5.6%), with non-residents at -0.1% and net bed occupancy 0.5 pp lower.

Tourist accommodation recorded 3.2 million guests and 7.8 million overnight stays, up 2.8% and 1.3% on a year earlier. Residents accounted for the whole of that gain, at 2.0 million stays (+5.6%), since non-residents stood at 5.8 million (-0.1%) after +7.7% in April.

Statistics Portugal flagged no calendar effect. Total revenue reached EUR 717.0 million (+8.7%) and room revenue EUR 550.6 million (+8.8%), with RevPAR at EUR 83.4 (+6.7%) and ADR at EUR 128.9 (+5.8%), while net bed occupancy came in at 52.3%, 0.5 pp lower.

For anyone operating or financing an asset, May 2025 is a month to read through rate: revenue rose without capacity being used more intensively, and the international base stopped keeping up with the domestic one.

KEY INDICATORS

Revenue far ahead of volume

GUESTS 3.2 M +2.8% YoY revised change	OVERNIGHT STAYS 7.8 M +1.3% YoY	TOTAL REVENUE EUR 717.0 M +8.7% YoY
ROOM REVENUE EUR 550.6 M +8.8% YoY revised change	REVPAR EUR 83.4 +6.7% YoY	NET BED OCCUPANCY 52.3% -0.5 pp YoY

Reading: total revenue advanced 8.7% against 1.3% for overnight stays, and net bed occupancy gave up 0.5 pp; the additional euros came from rate and mix rather than from more beds sold.

DEMAND

Only the domestic market added overnight stays

Resident overnight stays reached 2.0 million (+5.6%) and non-resident stays stood at 5.8 million (-0.1%). The ten largest source markets supplied 75.8% of non-resident stays: the United States stood out at +6.0%, ahead of Italy (+5.6%) and Canada (+4.2%). Brazil posted the sharpest drop (-11.6%) and Germany lost 7.7%, two markets whose weakness weighs more than their share of nights suggests.

Change in overnight stays by source market

May 2025, year-on-year change

Statistics Portugal, Tourism Activity - Flash Estimates, May 2025.

REGIONS

The North ahead, Algarve and Greater Lisbon in the red

Change in overnight stays by region

May 2025, year-on-year change

Statistics Portugal, Tourism Activity - Flash Estimates, May 2025.

The North led at +6.6%, followed by the Centre (+5.6%) and the Azores (+4.7%). At the other end, the Algarve (-3.1%) and Greater Lisbon (-0.7%) were the only two regions below zero, and they are also the two largest by overnight stays. In Madeira, the 3.3% gain rested on residents (+31.9%), with non-residents at -1.0%.

REGION IN FOCUS

The Algarve, the largest region by overnight stays, was the weakest at -3.1%, with residents at -3.0% and non-residents at -3.1%.

OPERATING PERFORMANCE

Rate did the work, occupancy did not

Portugal, tourist accommodation establishments.

ADR EUR 128.9 +5.8% YoY	REVPAR EUR 83.4 +6.7% YoY	NET BED OCCUPANCY 52.3% -0.5 pp YoY
NET ROOM OCCUPANCY 64.7% +0.5 pp YoY	TOTAL REVENUE EUR 717.0 M +8.7% YoY	ROOM REVENUE EUR 550.6 M +8.8% YoY revised change

ADR came in at EUR 128.9 (+5.8%) and RevPAR at EUR 83.4 (+6.7%). Net bed occupancy shed 0.5 pp to 52.3%, while net room occupancy added 0.5 pp to 64.7%. Total revenue of EUR 717.0 million (+8.7%) and room revenue of EUR 550.6 million (+8.8%) therefore rest on rate: with no gain in bed occupancy, ADR is what carries RevPAR.

REAL ESTATE LENS

Rate-driven revenue on a narrower demand base

FACT

Overnight stays +1.3%, with residents +5.6% and non-residents -0.1%; total revenue +8.7%, RevPAR +6.7%, ADR +5.8% and net bed occupancy -0.5 pp.

INTERPRETATION

With bed occupancy giving way, the RevPAR gain is almost all ADR. Asset performance in May depended on the ability to hold rate rather than to sell more nights, and at the same time the international market stopped offsetting the domestic one.

IMPLICATION

Separate the price effect from the volume effect before extrapolating revenue growth. In assets exposed to the Algarve, at -3.1%, or to the Brazilian market at -11.6%, the base narrowed, and a higher rate may not repeat if occupancy keeps giving way.

OUTLOOK

Three signals to watch in June

01	Whether non-resident overnight stays return to growth after May's -0.1%.
02	Whether the Algarve reverses its -3.1% as the peak season starts.
03	Whether net bed occupancy stabilises, or RevPAR comes to rest on ADR alone.
